Why Buy
GLYDE®
Condoms?

It's as simple as 1-2-3!

1) **GLYDE® is the ethical choice!**

ORGANIC FLAVOURS: GLYDE® uses organic food grade fruit extracts instead of chemical imitations.

FAIR TRADE: Latex rubber is sourced from owner operated plantations. Our Malaysian manufacturing facility pays their workers a fair living wage.

VEGAN & CRUELTY-FREE: Made without casein (a dairy protein), GLYDE® uses thistle extract in its recipe. GLYDE® has never been tested on animals.

CERTIFIED: GLYDE® is the first condom ever to be certified by The Vegan Society and the first condom recognized by PeTA. (People for the Ethical Treatment of Animals)

2) **It's easy to choose your perfect GLYDE® fit!**

49 mm Slimfit: A snug, form fitting feel.
53 mm Ultra: Simple natural comfort.
56 mm Maxi: For a little more room.

3) **GLYDE® is a premium, top quality brand you can trust!**

Made from the highest quality natural rubber latex using a patented "double-dipping" process that makes GLYDE® condoms especially strong while remaining ultra thin with a silky-smooth texture, GLYDE® meets or surpasses all Health Canada, FDA, and international tests for strength and durability.

9 Great Tips for Proper Condom Use

- 1) **Get the right fit!** If your condom is too tight it can break or if it's too loose it can slip off. Experiment with different GLYDE® sizes until you find your perfect fit.
- 2) **Keep it fresh!** For peak performance store your GLYDE® condoms in a cool dry place under 30°C (86°F), away from direct sunlight. Never keep condoms in your wallet or car!
- 3) **Handle with care!** Fingernails and jewellery can easily catch and tear condoms, so keep nails short & filed smooth and remove all your bling before play time!
- 4) **The wetter, the better?** Try placing a few drops of water or silicone based lubricant (never oil or petroleum) into the tip of the condom before rolling it on to enhance your pleasure! But don't go overboard, too much lube can cause your GLYDE® condom to slip off!
- 5) **Make room for the boys!** When unrolling the GLYDE® condom, make sure to squeeze the air out of the resevoir tip to leave room for the semen to collect after ejaculation.
- 6) **Get it on!** The sooner the better, as far as safety goes. Put on the GLYDE® condom during foreplay to ensure maximum protection from pregnancy and STDs throughout your encounter.
- 7) **Nothing lasts forever!** Studies show that most incidents of condom failure occur after 20 minutes of use, so adopt the healthy habit of routinely changing to a fresh GLYDE® condom during those marathon sessions!
- 8) **Rx for sex!** Some topical genital medications can affect the integrity of latex condoms; consult your doctor or pharmacist about possible interactions before using GLYDE® condoms.
- 9) **And you're spent!** Once the happy ending arrives, ensure it stays that way. Immediately withdraw after ejaculation with a firm grip on the base of the GLYDE® condom to reduce the risk of semen spillage.
